UN IMPEGNO PER L'AMBIENTE

Nel valutare e scegliere la rubinetteria per il tuo bagno non è più possibile sottovalutare l'importanza dell'aspetto ecologico: è una questione di rispetto verso l'ambiente.
Con i miscelatori a risparmio energetico e idrico è possibile ridurre notevolmente lo spreco di acqua e di energia perché intervengono sui due aspetti fondamentali colpevoli: la portata e la temperatura.
Gaboli ha introdotto in tutti i suoi miscelatori la possibilità di scegliere cartucce ECOWATER con regolatore di portata, ed ECOSKIMP che forniscono acqua fredda in apertura.

A COMMITMENT FOR THE ENVIRONMENT
Choosing bath for your bathroom, you should consider the importance of the ecological aspect, of the environment respect.
With saving energy mixers, it is possible to save water and consumption, acting on two foundamental aspects: the flow and the temperature.
Gaboli offers the possibility to choose ECOWATER cartridge (to regulate the flow) and ECOSKIMP cartridge (to supply cold water in opening position) for all mixers.

UN ENGAGEMENT POUR L'ENVIRONNEMENT
En évaluant et en choisissant les robinets pour votre salle de bain, il n'est plus possible de sous-estimer l'importance de l'aspect écologique. Avec les melangeurs d'économie d'énergie et d'eau, il est possible de réduire considérablement le gaspillage d'eau, parce qu'ils interviennent sur deux aspects fondamentaux: le débit et la température.
Gaboli a introduit dans tous ses mélangeurs la possibilité de choisir des cartouches ECOWATER avec réglage du débit et ECOSKIMP qui fournissent de l'eau froide lors de l'ouverture.

ECOWATER

ECO

Nella cartuccia **ECOWATER** la manopola
ha due posizioni di apertura:
al primo blocco si ottiene un flusso di acqua ridotto del 50%,
mentre per avere più acqua è necessario vincere
una resistenza e creare un'apertura più ampia.

*The **ECOWATER** cartridge has two opening positions:*
at the first block we can save 50% of the water flow.
Differently, to have more water, it is necessary to rise
the lever in a wider position.

La cartouche **ECOWATER** a deux positions d'ouverture:
au premier arrêt, on obtient un débit d'eau de 50%;
par contre pour obtenir un débit total,
il est necessaire de lever le levier au maximum.

ECOSKIMP

ES

La cartuccia **ECOSKIMP** fornisce acqua fredda all'apertura
con la leva in posizione centrale. Questo evita la richiesta
di acqua calda alla caldaia con il conseguente risparmio di energia.

*The **ECOSKIMP** cartridge supplies cold water*
with the lever in central position. This avoids the request
of hot water and permits to save energy.

La cartouche **ECOSKIMP** fournit de l'eau froide
lorsque le levier est en position centrale. Cela évite le besoin
d'eau chaude et permet une économie d'énergie.

Le for pour tout litige est Borgomanero et Novara, même si les commandes ont été fournies ailleurs. Elles n'ont aucune valeur et nous ne reconnaissons aucune déclaration, engagement ou garantie de quelque sorte que ce soit de la part de nos employés, agents ou représentants, qui ne sont pas de ces conditions générales de vente ou d'actes officiels que la société a souscrit.
Réserve de propriété : La marchandise livrée demeure la propriété de Gaboli jusqu'au paiement intégral de la facture.

8. GARANTIE : Les produits Gaboli, rigoureusement examinés et testés avant d'être mis en vente, sont garantis des défauts de fabrication pour une période de 5 ans (pour les finitions chromées) et d'une année pour toutes les autres finitions à partir de la date d'achat du premier acheteur.
Prestations de garantie :
– Défauts de moulage, défauts de porosité, défauts de chromage.
– La réparation ou le remplacement de la pièce défectueuse après la vérification de nos techniciens et du coupon de contrôle avec la preuve de la date d'achat.

Exclusion de la garantie :
– Réparations et manutentions effectuées de manière inadéquate ou sans autorisation préalable de la société.
– Utilisation incorrecte de la robinetterie.
– Détérioration de la robinetterie due à une installation incorrecte.
– Détérioration des surfaces avec des finitions autres que le chrome. Leur durée est en effet soumise au soin et à la délicate utilisation de l'utilisateur.
– Détérioration des superficies chromées due à l'utilisation de produits de nettoyage contenant des acides ou des substances abrasives, par conséquent Gaboli recommande vivement de nettoyer les surfaces chromées, en laiton ou colorées avec de l'eau et du savon, en utilisant un chiffon doux.

La garantie n'est pas renouvelable.
