FUXSABANY S.L.

Fundada en Valencia, España. Presentes internacionalmente.

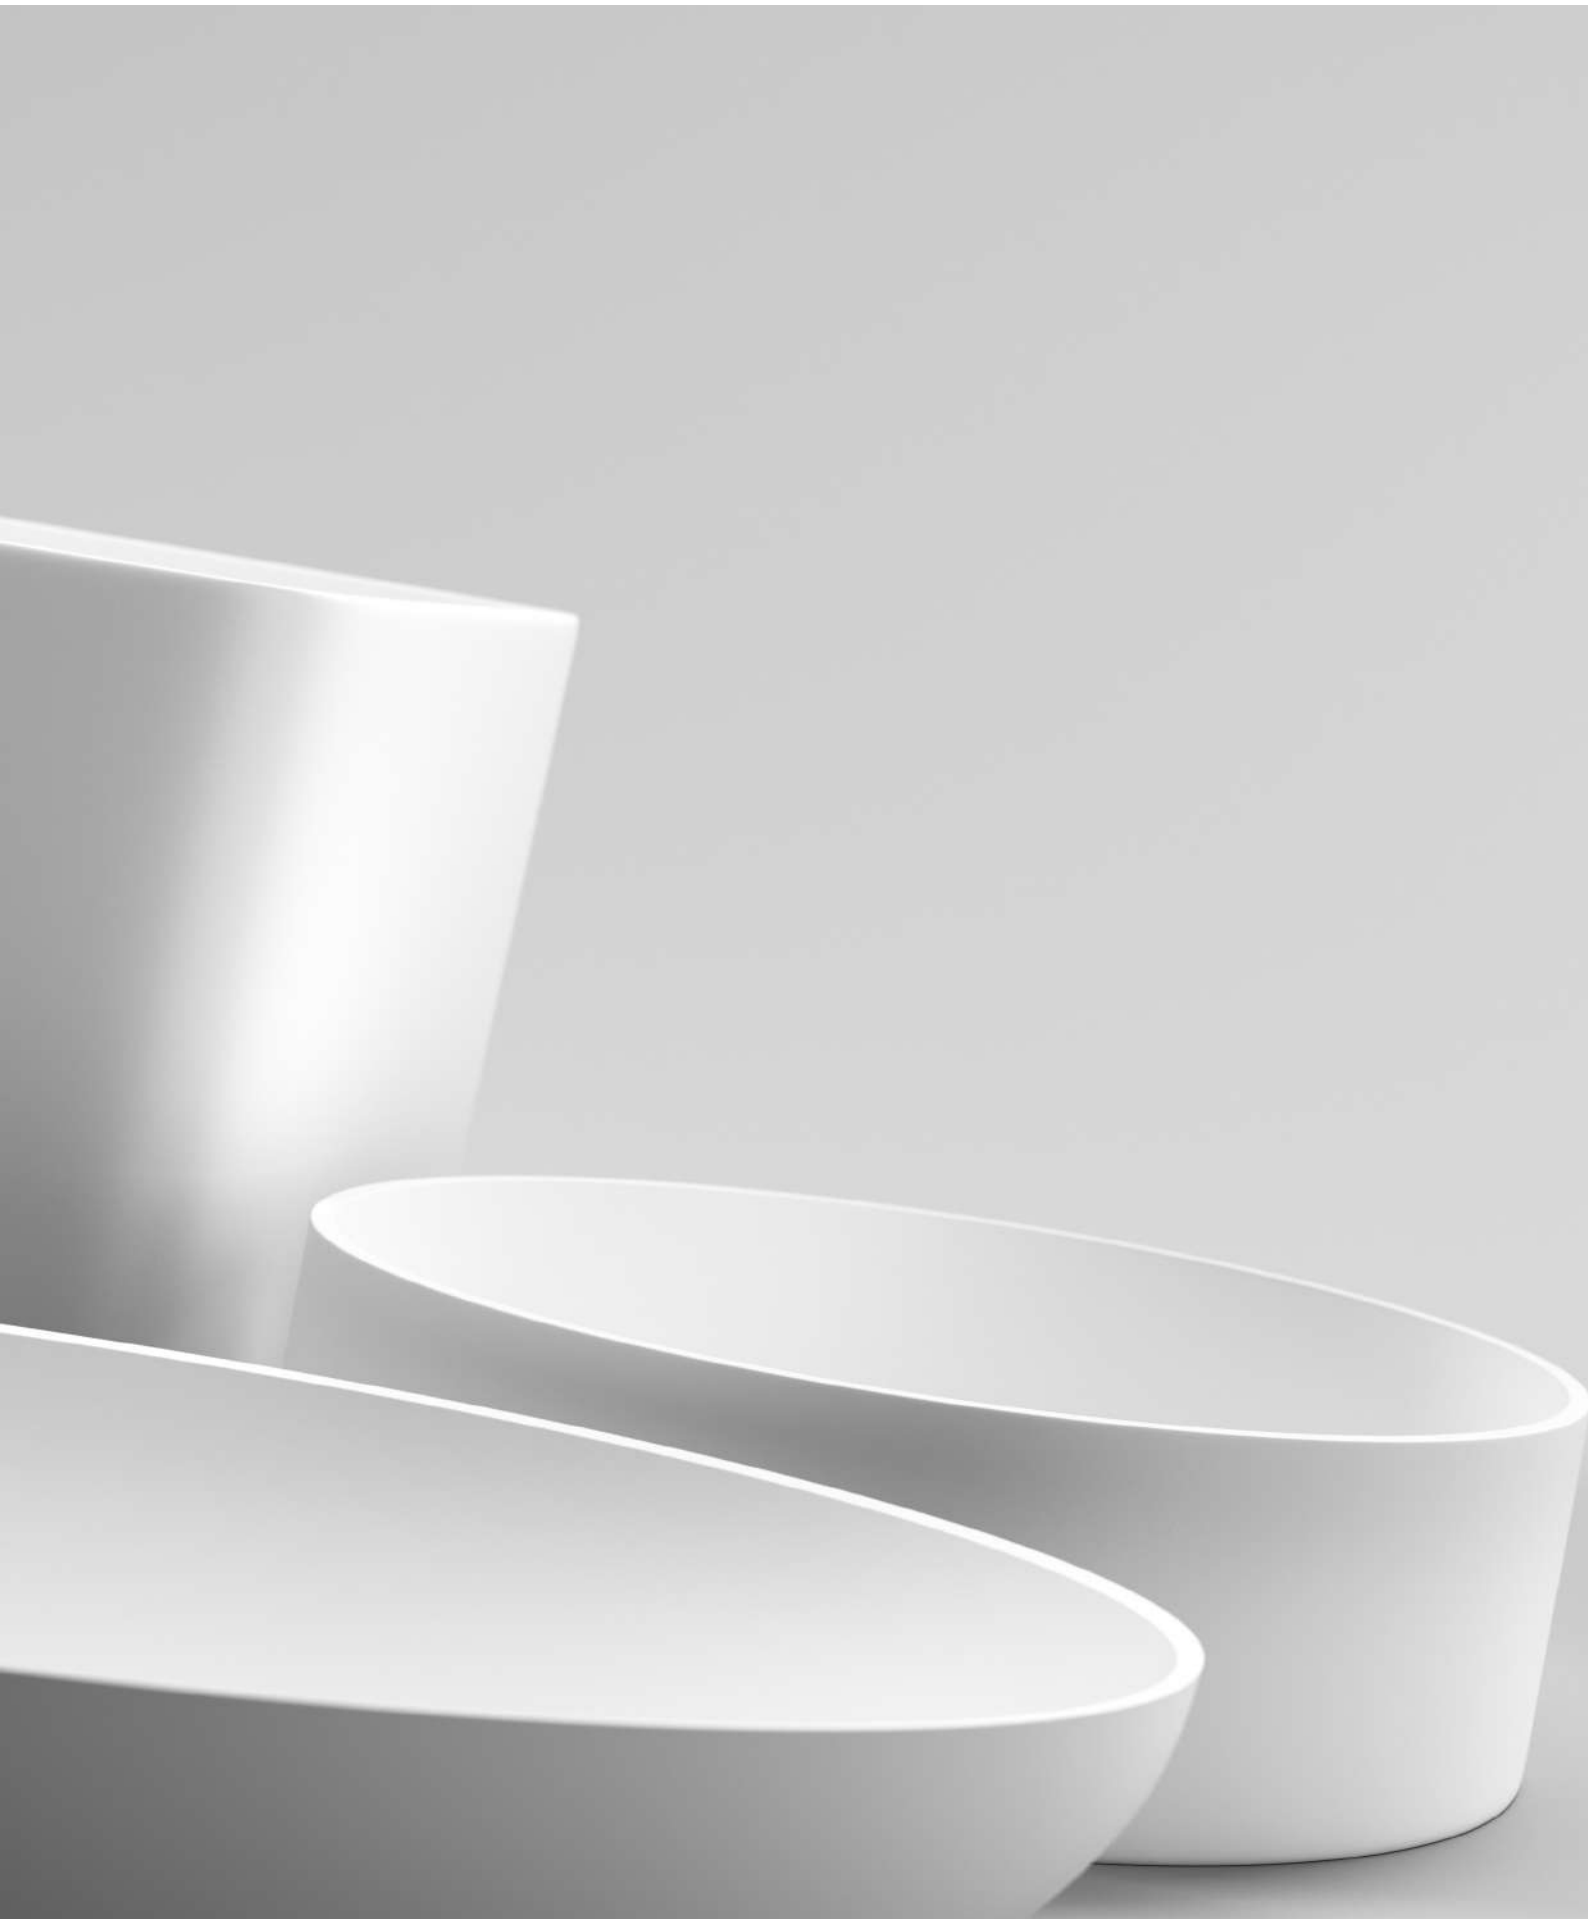

FUXSABANY es una empresa familiar, que inició su actividad en el campo del diseño de estancias del baño en 1997; Desde entonces, la empresa ha adoptado como pilares base la honestidad, la responsabilidad, la integridad y la audacia.

Con más de 20 años de experiencia, FUXSABANY ha brindado soluciones arquitectónicas y de diseño para el baño con innovación, calidad y servicio únicos.

Nuestras oficinas centrales tienen su sede en Valencia, España; teniendo acceso directo al Puerto de Valencia, que es el quinto puerto marítimo más transitado de Europa y el puerto más transitado del Mediterráneo. A través de una red en constante expansión, distribuimos a más de 25 países en todo el mundo.

Nuestra misión es llevar calidad, elegancia e innovación a todos los baños del mundo.

FUXSABANY se esfuerza continuamente por mejorar su impacto con el medio ambiente. Las iniciativas sostenibles mas recientes y en curso incluyen la conversión a iluminación LED en nuestras plantas y oficinas, el reciclaje proactivo de materiales industriales y de oficina, y la instalación de paneles solares para permitir casi la autosuficiencia en la planta.

We elaborate our Ceramic by combining raw materials such as clay, kaolin, and quartz. In order to guarantee the best quality, FUXSABANY ceramic products are made of fine fire-clay obtained from a high-quality mixture of raw materials. Our Ceramic washbasins are stain-resistant, antibacterial and easy to maintain. They can easily be sanitized with normal household cleaning products.

Elaboramos nuestra Cerámica combinando materias primas como arcilla, caolín y cuarzo. Para garantizar la mejor calidad, los productos cerámicos FUXSABANY están hechos de arcilla refractaria fina obtenida de una mezcla de materias primas de alta calidad. Nuestros lavabos de cerámica son resistentes a las manchas, antibacterianos y fáciles de mantener. Se pueden sanitanizar fácilmente con productos de limpieza domésticos normales.

STRUCTURES
ESTRUCTURAS

Both Aluminum and Stainless Steel Structures have a square profile. The Aluminum one can be epoxy lacquered in matte black or white. These minimal dovetail structure provides the strongest mechanical bond simply by the joinery of shaped fingers. To achieve a rigid, robust and compact structure, conical screws are used in order to connect all the elements in the structure.

We manufacture our structures with the following profiles thicknesses:
20 x 20 mm

Additionally, we can manufacture any design; our structures are fully customizable.

ALUMINUM | ALUMINIO
+
STAINLESS STEEL | ACERO INOX

Tanto las estructuras de Aluminio como las de Acero Inoxidable tienen un perfil de 20x20 mm. Las estructuras de Aluminio pueden ser lacado con epoxi en negro mate o blanco. Estas estructuras minimalistas proporcionan la unión mecánica más fuerte posible, mediante la unión de machihembrado. Para lograr una estructura rígida, robusta y compacta, se utilizan tornillos cónicos para conectar todos los elementos de la estructura.

Producimos nuestras estructuras con los siguientes espesores:
20 x 20 mm

Adicionalmente, podemos producir cualquier diseño, nuestras estructuras son completamente personalizables.
