Water is a precious commodity. Hand showers and shower heads that use Water-Saving technology avoid water waste by reducing water consumption by up to 40%.

ANTICALCARE | *EASY CLEAN*

La tecnologia Easy Clean permette di rimuovere rapidamente i residui e i depositi di calcare presenti nell'acqua dalle docce e dai soffioni grazie agli ugelli flessibili in silicone con un semplice strofinio del dito.

The Easy Clean technology allows you to swiftly remove debris and deposits of limescale from both showers and shower heads thanks to flexible anti-limescale silicone jets.

INIEZIONE DI ARIA | *AIR SYSTEM*

La tecnologia Air-System permette di realizzare un getto più frizzante mescolando aria ed acqua. Questa combinazione produce zampilli morbidi e leggeri, che ricordano l'effetto naturale della pioggia.

With the Air-System technology, the waterflow is aerated by combining air and water, benefiting the shower experience with soft and smooth waterflows, reminiscent of the natural rainfall.

CROMOTERAPIA | *COLORTHERAPY*

Luci LED RGB con effetto cromoterapia integrati negli ugelli del soffione e della doccia trasformano il getto d'acqua in un veicolo di luce e colore. I prodotti Damast non necessitano di un punto corrente poiché integrano una dinamo interna che si aziona con la forza dell'acqua.
